Naman Gupta

Product Owner @ Digio · ex-Capital One, Ninjacart · Fintech, lending, supply chain & marketplaces

India hello@namanbuilds.com +91 99338 80001 linkedin.com/in/gupta-naman-iitkgp namanbuilds.com

PROFESSIONAL SUMMARY

Product manager with 7 years building fintech, lending, supply chain and marketplace products end to end — from the first underwriting rule to a live platform at national scale. At Digio I own the onboarding and verification stack behind 200K+ checks a day, including the no-code builder clients use to assemble their own KYC journeys. A Mathematics & Computing background lets me challenge architecture, data models and trade-offs rather than take them on trust. I work in Scrum and write the epics and stories myself. I have shipped websites, Android and iOS apps and B2B SaaS platforms, with teams across India, the US, Russia, China and Thailand.

PROFESSIONAL EXPERIENCE

Dec 2024 – Present

Product Owner — Digio

Digital identity, eSign & payments platform

Products: No-code Workflow Builder · KYC & onboarding journeys · Verification APIs · Fraud & risk checks

- I own the no-code Workflow Builder — the backbone clients use to assemble their own KYC journeys without us writing code for each one. I specified the drop-off analytics behind it, so leakage is attributable per client and per step; **12%+ revenue growth**.
- I own the onboarding and verification stack behind 200K+ checks a day, up from 60K+ — which checks run in which journey, where each threshold sits, and what the journey does when one fails.
- I run selfie liveness, document verification, OCR and fraud checks as product lines: what each must decide, the data it needs, and how it is priced and sold to clients.
- I write the epics, stories and acceptance criteria in Jira for a 12-member team across engineering, ML, annotation, design and mobile, running Scrum from spec to release.

Feb 2023 – Dec 2024

Senior Product Manager — Ninjacart

B2B fintech charter ‘Ninja Credit’ — KYC, lending (LOS/LMS), BNPL & payments

Products: Ninja Global · Unified Credit-Line Framework · Payment Guarantee

Youngest PM promoted to Senior PM

- **Built 0→1.** I created Ninja Global, a cross-border B2B trade platform, and took it from nothing to an **INR 180 Cr annualised GMV run-rate within two months of launch** — sequencing the rollout with sales, support and lending partners.
- I shipped the Unified Credit-Line Framework behind **~$350M of annual disbursals** and cut NPA from 6% to 2% by making underwriting decisions data-driven rather than relationship-driven.
- **Chose the vendors, then integrated them.** I compared the payments and KYC providers — Karza, Razorpay, Xflow and Onfido — on coverage, pricing and failure rates, then led the API integration and documentation. Automating document verification cut CAC 8%.

May 2021 – Feb 2023

Product Manager — Cogoport

International logistics & supply chain B2B SaaS — freight, pricing and trade finance

Products: Market Intelligence Platform · Invoice Discounting · Freight Booking & Pricing

- I built the Market Intelligence Platform for 30,000+ importers and exporters — supply chain and freight pricing forecasts built on data ingestion and scraping pipelines I specified, cutting CAC cycle time 25% and lifting email CTR 15%.
- I built Invoice Discounting, managing $20M+ of credit, and partnered with sales and key accounts to win the company’s largest enterprise deals — INR 100 Cr+ revenue impact, CEO’s ‘Money Moghul’ award.

Jun 2020 – Apr 2021

Associate — Capital One

Product: Zones of Interest — finding the root cause in customer calls and support tickets

- I built the product that analyses customer calls and support tickets to find the root cause of an issue and surface the resolution — serving **3M+ customers a month** and cutting resolution time **40%**. Awarded US Patent US12387059B2.
- I used topic modelling and sentiment analysis over the same data to surface 20%+ additional business insight for the operations teams.

Early career: Co-Founder, CelebValley.

INTERNSHIPS

Internships: Analyst, HSBC London · Investment & Strategy, InnoVen Capital (Temasek).

PATENT

US PATENT 12,387,059 B2 · CAPITAL ONE · GRANTED 2025

Identifying zones of interest in text transcripts using deep learning

Co-inventor. The system behind the Zones of Interest product — deep learning / NLP over 3M+ customer call transcripts a month.

EDUCATION

2015 – 2020

Indian Institute of Technology (IIT) Kharagpur

Dual Degree (Integrated BSc. & MSc.), Mathematics & Computing · CGPA 8.0/10

CORE SKILLS

Domains	Fintech and lending · KYC, identity and onboarding · International logistics and supply chain · B2B marketplaces and SaaS.
Product & delivery	Roadmap and prioritisation, PRDs and specs, epics and stories in Scrum, acceptance criteria, B2B SaaS, stakeholder communication across Engineering, Design, Security and Legal. Jira, Confluence, Linear, Notion.
Analytics & experiments	Funnel, cohort and drop-off analysis, A/B testing. SQL, Mixpanel / Amplitude, Metabase / Looker, Looker Studio, Power BI, Google Analytics (GA4), Excel and Sheets, experimentation tools (Statsig / Optimizely).
APIs & docs	API integration and documentation, Postman, Swagger / OpenAPI — including the KYC and verification API surface at Digio and the Karza, Razorpay, Xflow and Onfido integrations at Ninjacart.
AI & data	Applied ML in production, deep learning, NLP, topic modeling, sentiment analysis, computer vision (liveness), OCR, fraud & risk decisioning, data ingestion pipelines, event instrumentation. Python, SQL. LLM APIs (OpenAI, Claude, Gemini), prompt and eval tooling (LangSmith / Promptfoo), Cursor and Claude Code for prototyping.
Design & research	Figma, Miro / FigJam, user testing with Maze / Hotjar.
Prototyping	Building working prototypes without engineering time — Lovable, v0 / Bolt, n8n / Zapier.

CERTIFICATIONS & RECOGNITION

Certifications	Postgraduate in AI — BITS Pilani · Agile Scrum Master (ASM) — IBM · Google UX Design — Google.
Awards	US Patent US12387059B2 (AI/NLP) · Product Champion & Maverick, Ninjacart · Money Moghul, Cogoport.
