PROFESSIONAL SUMMARY

I am a product manager with 6+ years owning software products end-to-end, from **roadmap and strategy** through build, launch and iteration. I run a verification platform serving 150K+ decisions a day, took a 0→1 cross-border product to an INR 180 Cr annualized GMV run-rate, and hold a US patent in applied AI. I decide from **quantitative evidence** — funnel instrumentation, drop-off analysis, A/B tests — and write the **specs and stakeholder updates** that keep engineering, design and go-to-market on one outcome.
